

Maneeth K

Phone: 7377421874 | Email: kmaneethreddy005@gmail.com

PROFESSIONAL SKILLS:

- UX/UI Designer with **8+ years of experience** designing intuitive, user-centered web and mobile applications across Healthcare, SaaS, Enterprise, and Financial Services domains, delivering scalable digital products that improve usability, engagement, and business outcomes.
- Expertise in Figma, FigJam, Wireframing, Interactive Prototyping, User Flows, Information Architecture, Design Systems, and Responsive Design, with extensive experience creating accessible and visually engaging interfaces.
- Proven ability to conduct comprehensive **UX research**, including stakeholder interviews, user interviews, usability testing, heuristic evaluations, competitive analysis, persona development, customer journey mapping, and affinity mapping to identify user pain points and optimize digital experiences.
- Strong experience collaborating with **Product Managers, Business Analysts, Software Engineers, QA teams, and cross-functional stakeholders** in Agile Scrum environments to transform business requirements into user-centered design solutions.
- Designed and maintained scalable **Design Systems and reusable component libraries** that improved design consistency, accelerated development cycles, and reduced UI implementation effort across multiple enterprise applications.
- Extensive experience creating low-fidelity wireframes, high-fidelity mockups, clickable prototypes, design specifications, interaction models, and user workflows using Figma while ensuring alignment with accessibility standards and responsive design principles.
- Experienced in designing responsive applications for **desktop, tablet, and mobile platforms**, ensuring seamless user experiences across multiple devices and operating systems while maintaining consistency with modern UI standards.
- Applied **AI-powered design tools** including ChatGPT, Figma AI, Uizard, Galileo AI, and AI-assisted research platforms to accelerate UX research, content generation, competitive analysis, and rapid design exploration within modern product development workflows.
- Strong understanding of Human-Centered Design (HCD), Design Thinking, Interaction Design, Information Architecture, Visual Hierarchy, Cognitive Psychology, and User Behavior Analysis to create intuitive digital experiences.
- Collaborated closely with React and React Native development teams by delivering production-ready design specifications, interactive prototypes, component documentation, and developer handoff assets that significantly reduced implementation rework.
- Conducted accessibility audits using **WCAG 2.2 guidelines**, ensuring applications met ADA compliance standards while improving usability for users with diverse accessibility needs across enterprise applications.
- Utilized user analytics platforms including **Google Analytics, Hotjar, Mixpanel, and FullStory** to evaluate user behavior, identify usability issues, validate design decisions, and continuously improve product adoption and customer satisfaction.
- Demonstrated exceptional communication, presentation, and stakeholder management skills by facilitating UX workshops, presenting design concepts to executive leadership, gathering feedback, and aligning design decisions with strategic business objectives.
- Passionate about AI-first product development, continuous learning, rapid iteration, and solving complex business problems through user-centered design methodologies while balancing business goals with customer needs.
- Committed to delivering high-quality digital experiences by combining creativity, analytical thinking, usability best practices, accessibility standards, and collaborative problem-solving to build products that drive measurable business success.

CORE SKILLS :

UX Design: User-Centered Design (UCD), Human-Centered Design (HCD), Design Thinking, Interaction Design, Visual Design, Responsive Design, Mobile UX, Information Architecture, User Experience Strategy

UI Design & Prototyping: Figma, FigJam, Adobe XD, Sketch, Wireframing, Low-Fidelity Mockups, High-Fidelity Mockups, Interactive Prototypes, Clickable Prototypes, User Flows

UX Research: User Interviews, Persona Development, Journey Mapping, Competitive Analysis, Affinity Mapping, Contextual Inquiry, Card Sorting, Heuristic Evaluation, Surveys, Usability Testing

Design Systems: Design Systems, Component Libraries, Atomic Design, Design Tokens, Style Guides, UI Standards, Reusable Components

Front-End Collaboration: React, React Native, HTML5, CSS3, JavaScript, Bootstrap, Responsive Layouts, Developer Handoff, Design Specifications

Accessibility: WCAG 2.2, ADA Compliance, Screen Reader Support, Keyboard Navigation, Color Accessibility, Inclusive Design

Analytics & User Insights: Google Analytics 4, Hotjar, Mixpanel, FullStory, Maze, A/B Testing, Heatmaps, User Behavior Analysis

AI Design Tools: ChatGPT, Figma AI, Galileo AI, Uizard, Midjourney, Dovetail AI, Notion AI

Project & Collaboration Tools: Jira, Azure DevOps, Confluence, Slack, Microsoft Teams, Miro, Zeplin

Methodologies: Agile Scrum, Lean UX, Design Thinking, Continuous Discovery, Rapid Prototyping, Design Sprints, SDLC

PROFESSIONAL EXPERIENCE:

Teladoc Health || Jun 2023 - Present

Role: Senior UX/UI Designer

Responsibilities:

- Led end-to-end UX design initiatives for cloud-based healthcare applications by collaborating with product owners, clinicians, developers, and business stakeholders to create intuitive digital experiences that improved patient engagement and operational efficiency.
- Designed responsive web and mobile interfaces in **Figma**, creating detailed wireframes, interactive prototypes, high-fidelity mockups, and comprehensive user flows that reduced user navigation complexity and enhanced overall usability.
- Conducted extensive user research through stakeholder interviews, usability testing sessions, surveys, and competitive analysis to identify user pain points and translate research findings into actionable design improvements.
- Created detailed personas, empathy maps, customer journey maps, and information architecture models to simplify complex healthcare workflows while improving user satisfaction across patient and provider portals.
- Collaborated closely with React and React Native development teams by delivering production-ready design specifications, reusable UI components, and interactive prototypes that accelerated front-end implementation and reduced design inconsistencies.
- Developed and maintained enterprise-wide **Figma Design Systems**, reusable component libraries, typography standards, spacing guidelines, and accessibility-compliant UI components that improved consistency across multiple digital products.
- Leveraged AI-powered design tools including **ChatGPT, Figma AI, and Galileo AI** to accelerate UX research, generate design concepts, optimize interface content, and improve design exploration during early product discovery phases.
- Conducted usability testing sessions with healthcare professionals and patients, analyzing qualitative and quantitative feedback to identify usability issues and iteratively improve workflows, navigation, and accessibility.
- Designed fully responsive user experiences optimized for desktop, tablet, and mobile devices while ensuring consistency across multiple screen sizes and compliance with modern responsive design principles.
- Worked extensively with Product Managers during Agile sprint planning sessions to prioritize UX improvements, refine product requirements, estimate design effort, and align user needs with business objectives.
- Ensured all interfaces complied with **WCAG 2.2 accessibility guidelines**, implementing accessible color contrast, keyboard navigation, semantic labeling, and screen reader compatibility to improve inclusive user experiences.
- Used **Google Analytics, Hotjar, Mixpanel, and FullStory** to analyze user behavior, identify friction points, measure engagement metrics, and validate UX decisions using real user data and behavioral insights.
- Facilitated design reviews, stakeholder presentations, and cross-functional workshops to communicate UX strategy, present interactive prototypes, gather feedback, and drive consensus across business and technical teams.
- Partnered with QA engineers and software developers throughout implementation, performing UI validation, design reviews, and usability verification to ensure pixel-perfect execution and high-quality user experiences.
- Continuously evaluated emerging UX trends, AI-assisted design workflows, accessibility standards, and industry best practices to enhance product innovation, improve design efficiency, and deliver exceptional digital experiences aligned with evolving user expectations.

Environment:

Figma, FigJam, Adobe XD, React, React Native, HTML5, CSS3, JavaScript, Design Systems, Wireframing, Interactive Prototyping, User Research, Usability Testing, WCAG 2.2, Google Analytics, Hotjar, ChatGPT, Figma AI, Jira, Confluence, Agile Scrum.

CVS health || June 2021 - May 2023

Role: Senior UX Designer

Responsibilities:

- Led UX design initiatives for digital healthcare and pharmacy applications, creating seamless experiences that improved patient engagement, prescription management, and member self-service capabilities.
- Collaborated with Product Managers, clinical stakeholders, pharmacists, business analysts, and engineering teams to translate healthcare requirements into intuitive, user-centered digital solutions.
- Designed responsive web and mobile experiences for prescription refills, appointment scheduling, digital pharmacy services, vaccination management, and healthcare benefits platforms using **Figma**.

- Developed end-to-end user journeys, service blueprints, and workflow models that simplified complex healthcare processes while reducing user effort and improving task completion rates.
- Conducted user interviews, contextual inquiries, and usability testing sessions with patients, caregivers, and healthcare professionals to identify usability challenges and improve digital experiences.
- Created scalable design systems, reusable UI components, typography guidelines, and standardized interaction patterns that ensured consistency across multiple healthcare products.
- Designed high-fidelity mockups, interactive prototypes, wireframes, and developer-ready specifications that accelerated product development and reduced implementation rework.
- Partnered closely with React and React Native engineering teams to validate responsive interfaces, component behaviors, and user interactions throughout Agile development cycles.
- Leveraged AI-powered design tools including **ChatGPT**, **Figma AI**, and **Galileo AI** to accelerate UX research, content generation, accessibility reviews, and rapid design exploration.
- Applied **WCAG 2.2 accessibility standards** across patient-facing applications, improving screen-reader compatibility, keyboard navigation, color accessibility, and inclusive user experiences.
- Utilized **Google Analytics**, **Hotjar**, and **Mixpanel** to analyze patient behavior, identify usability bottlenecks, measure feature adoption, and prioritize continuous UX improvements.
- Facilitated design workshops, stakeholder reviews, and cross-functional collaboration sessions to align business objectives with user needs and accelerate product decision-making.
- Worked closely with QA teams during implementation to review completed interfaces, validate UX requirements, and ensure pixel-perfect execution before production releases.
- Supported Agile product teams through sprint planning, backlog refinement, design critiques, and continuous iteration while delivering high-quality UX solutions within tight project timelines.
- Researched emerging healthcare UX trends, AI-driven design methodologies, and digital patient engagement strategies to continuously enhance product usability and improve overall customer satisfaction.

Environment:

Figma, FigJam, React, React Native, HTML5, CSS3, JavaScript, Design Systems, Wireframing, Interactive Prototyping, User Research, WCAG 2.2, Google Analytics, Hotjar, Mixpanel, ChatGPT, Figma AI, Jira, Confluence, Agile Scrum.

Cisco Systems | Jan 2019 - May 2021

Role: UI/UX Designer

Responsibilities:

- Designed intuitive user experiences for enterprise networking, cloud management, and infrastructure monitoring platforms used by IT administrators and enterprise customers.
- Simplified highly technical workflows by redesigning configuration, monitoring, and reporting interfaces, enabling users to complete complex administrative tasks with greater efficiency.
- Created scalable dashboard experiences that improved real-time visibility into network health, system alerts, performance metrics, and operational insights.
- Designed responsive interfaces for cloud-based management applications, ensuring seamless usability across desktop, tablet, and mobile platforms.
- Built reusable UI patterns and standardized navigation models that improved consistency across multiple enterprise networking products.
- Collaborated with Product Managers and Solution Architects to convert complex technical requirements into intuitive, user-friendly workflows and interface designs.
- Produced detailed wireframes, interaction models, user flows, and high-fidelity prototypes using **Figma**, enabling stakeholders to validate product functionality before development.
- Worked closely with React development teams to ensure accurate implementation of responsive layouts, interactive components, and enterprise design standards.
- Optimized information architecture by restructuring navigation, categorization, and workflow sequences to improve discoverability and reduce user effort.
- Conducted workflow validation sessions with enterprise customers and internal technical teams to refine interface designs and improve operational efficiency.
- Developed standardized UI documentation, component usage guidelines, and design specifications that improved collaboration between UX and engineering teams.
- Integrated AI-assisted design workflows using **ChatGPT** and **Figma AI** to accelerate UX documentation, design exploration, and content refinement.

- Supported accessibility initiatives by incorporating **WCAG** guidelines into enterprise dashboards, improving usability for diverse user groups.
- Participated in Agile ceremonies, design reviews, sprint planning, and backlog refinement while ensuring UX deliverables aligned with release schedules.
- Evaluated emerging enterprise UX trends and cloud application design patterns to continuously improve usability, scalability, and customer satisfaction.

Environment:

Figma, FigJam, React, HTML5, CSS3, JavaScript, Design Systems, Enterprise Dashboards, Wireframing, Prototyping, WCAG, ChatGPT, Figma AI, Jira, Confluence, Agile Scrum.

Walgreens || Aug 2018 - Jan 2019

Role:UX Designer

Responsibilities:

- Designed user-centered digital experiences for pharmacy, retail, and e-commerce applications, improving customer engagement across online prescription and shopping platforms.
- Enhanced the online prescription refill process by simplifying user workflows, reducing navigation complexity, and improving task completion efficiency.
- Created responsive user interfaces for pharmacy services, appointment scheduling, account management, and loyalty program features across web and mobile applications.
- Designed low-fidelity wireframes, interactive prototypes, and high-fidelity mockups using Figma to communicate design concepts throughout the product lifecycle.
- Collaborated with pharmacy operations, marketing, and digital product teams to understand customer needs and translate business requirements into intuitive UX solutions.
- Improved product discoverability by redesigning search functionality, navigation structures, and category organization within retail e-commerce applications.
- Supported the evolution of reusable UI components and foundational design standards that improved consistency across multiple digital customer experiences.
- Conducted customer feedback sessions and usability evaluations to identify friction points and continuously improve online shopping and pharmacy workflows.
- Designed accessible interfaces by applying WCAG guidelines, improving readability, color contrast, keyboard accessibility, and inclusive user interactions.
- Partnered with front-end developers to review implemented interfaces, validate design quality, and ensure accurate execution of responsive layouts.
- Assisted in creating design documentation, interaction specifications, and developer handoff materials that streamlined implementation activities.
- Leveraged AI-powered productivity tools including ChatGPT to accelerate UX documentation, design ideation, and content optimization for customer-facing applications.
- Participated in Agile sprint planning, backlog refinement, design critiques, and cross-functional collaboration sessions to deliver UX enhancements on schedule.
- Monitored customer behavior using analytics tools to identify opportunities for improving conversion rates, engagement, and overall digital experience quality.
- Stayed current with evolving mobile UX trends, accessibility standards, and e-commerce best practices to introduce continuous improvements across digital products.

Environment:

Figma, Adobe XD, HTML5, CSS3, JavaScript, Wireframing, Interactive Prototyping, Responsive Design, User Research, WCAG, Google Analytics, ChatGPT, Jira, Confluence, Agile Scrum.

Education:

Bachelors in Computer Science |
Jawaharlal Nehru Technological University Hyderabad
